Keeley, a coworker was able to review this yesterday and she determines the project is NOT on State owned aquatic lands – private tidelands in this area. Thanks.

Brenda Werden
Washington State Department of Natural Resources (DNR)

Subject: DNR easement or RoW requirement for Edmonds Marsh daylighting restoration project

Hi Brenda,

Thanks for taking the time to connect with me on the City of Edmonds Edmonds Marsh daylighting project. This project is also known as the Willow Creek daylighting project and all project info is available on PRISM (proj #11-1553).

Attached is the DRAFT proposed conditions map of the project area, which is located in the City of Edmonds, just south of the downtown. You'll see the Marina in the map, which is a good locator to orient yourself. Also attached is a project brief.

The RCO requirement from DNR is as follows:

> **Has Washington Department of Natural Resources confirmed that your project is or is not on state-owned aquatic lands?** *Please refer to RCO Manual 18, Salmon Recovery Grants, Section 7 for information on state-owned aquatic lands and who to contact at Department of Natural Resources. Projects on state-owned aquatic lands must attach a Landowner Acknowledgement Form (RCO Manual 18, Salmon Recovery Grants,* Appendix K) *in PRISM signed by Department of Natural Resources. If the location of your design is not yet known in order to make this determination, write N/A).*

The third attachment is the required Landowner Acknowledgement Form that is referenced in the above paragraph.

Please let me know what your findings are and if you require additional information from me.

Thanks,
Keeley
