Memo: Intensively Monitored Watershed Certification – Asotin IMW Monitoring 2017, Project 17-1304

Snake River Salmon Recovery Board (SRSRB) staff have worked with the Asotin County Conservation District and the coordinator of the Asotin IMW, Ecological Inc., to develop the Asotin IMW Monitoring project proposal. The location and methods for monitoring were developed by and are a direct recommendation from the IMW implementation team for the continuation of the IMW itself.

Therefore, the SRSRB certifies that to our knowledge the proposed project contributes to and will not negatively affect ongoing data collection and salmon restoration efforts within the Asotin IMW, in fact, without funding the continuation of the IMW is in jeopardy.

John Foltz
Executive Director
Snake River Salmon Recovery Board
