## Amendment Agreement Description

**Project Number:** 15-1048 P

**Project Title:** Camano Is State Park Tidal Marsh Feasibility

**Amendment Number:** 7

---

### Agreement Description

This project intends to evaluate potential actions and design alternatives for restoring natural hydrological processes to the unique shoreline land form located at Camano Island State Park. This project's goal will determine the feasibility of restoring natural processes to the site given modern land use constraints. If an action is deemed feasible, we will develop a preliminary design in a manner consistent with natural habitat processes, and the recreational and educational uses of the park envisioned by Washington State Parks staff and citizen user groups. Any restoration outcome would target feeding and rearing habitat improvements for out-migrating juvenile Chinook salmon.
