Overall Project Metrics

#### Grant Manager Comment

The dates in the budget and project narrative indicate you don't expect to complete the project until Sept 2025. Please update your completion date if that is the case to be consistent.

#### Grant Manager Comment

- Budget worksheet: The total project cost is \$128,001, but should be your request plus match, which equals \$200,089. Please revise the "estimated total costs" section to capture the total project cost (or reduce your request and match if the project cost is in fact lower).  
- Project and Budget Narrative: The attached budget and PRISM indicate your ESRP request is \$139,771, but the project narrative indicates a slightly higher request and total project cost. I suggest revising all documents as needed to be consistent.
