

PROJECT: 24-1120 REST, HIDDEN BEACH RESTORATION SHORELINE

Sponsor: NW Straits Marine Cons Found Program: Salmon State Projects Status: Wastebasket

Parties to the Agreement

PRIMARY SPONSOR

Northwest Straits Marine Conservation Foundation

Address 1155 North State St. #400

City Bellingham State WA Zip 98225

Org Type Non-Gov-Nonprofit

Vendor # SWV0046498-00

UBI 602127534

Date Org created

Org Notes

QUESTIONS - PRIMARY SPONSOR

#1: What date was your organization created?

#2: Is your organization registered as a non-profit with the Washington Secretary of State?

Yes

#2a: Please confirm the Unified Business Identifier (UBI) shown above is correct or provide if blank.

#3: How long has your organization been involved in salmon and habitat conservation?

#4: Do your organizational documents (charter, bylaws, or articles of incorporation) include the authority for the protection or enhancement of natural resources or related activities?

Yes

#5: Do your organizational documents (charter, bylaws, or articles of incorporation) provide for an equivalent successor organization in case the nonprofit dissolves?

Yes

SECONDARY SPONSORS

No records to display

MANAGING AGENCY

Recreation and Conservation Office

LEAD ENTITY

Island County LE

QUESTIONS

#1: List project partners and their role and contribution to the project.

Questions

#1: Project location. Describe the geographic location, water bodies or habitat types, and the location of the project in the watershed, i.e. nearshore, tributary, main-stem, off-channel, etc.

#2: How does this project fit within your regional recovery plan and/or local lead entity's strategy to restore or protect salmonid habitat? Cite section and page number.

#3: Is this project part of a larger overall project?

#4: Is the project on State Owned Aquatic Lands? Please contact the Washington State Department of Natural Resources to make a determination. [Aquatic Districts and Managers](#)

Project Proposal

Project Description

Removal of the armor will: restore cross shore connectivity, linking nearshore, backshore, and uplands; increase intertidal nursery habitat for juvenile salmonids and spawning habitat for forage fish; increase the transfer and inputs of nutrients; and increase sediment input from adjacent feeder bluffs.

Project Questions

Project Application Report - 24-1120

- #1: Problem statement. What are the problems your project seeks to address? Include the source and scale of each problem. Describe the site, reach, and watershed conditions. Describe how those conditions impact salmon populations. Include current and historic factors important to understand the problems.
- #2: Describe the limiting factors, and/or ecological concerns, and limiting life stages (by fish species) that your project expects to address.
- #3: What are the project goals? The goal of the project should be to solve identified problems by addressing the root causes. Then clearly state the desired future condition. Include which species and life stages will benefit from the outcome, and the time of year the benefits will be realized. [Example Goals and Objectives](#)
- #4: What are the project objectives? Objectives support and refine biological goals, breaking them down into smaller steps. Objectives are specific, quantifiable actions the project will complete to achieve the stated goal. Each objective should be SMART (Specific, Measurable, Achievable, Relevant, and Time-bound). [Example Goals and Objectives](#)
- #5: Scope of work and deliverables. Provide a detailed description of each project task/element. With each task/element, identify who will be responsible for each, what the deliverables will be, and the schedule for completion.
- #6: What are the assumptions and physical constraints that could impact whether you achieve your objectives? Assumptions and constraints are external conditions that are not under the direct control of the project, but directly impact the outcome of the project. These may include ecological and geomorphic factors, land use constraints, public acceptance of the project, delays, or other factors. How will you address these issues if they arise?
- #7: How have lessons learned from completed projects or monitoring studies informed this project?
- #8: Describe the alternatives considered and why the preferred was chosen.
- #9: How were stakeholders consulted in the development of this project? Identify the stakeholders, their concerns or feedback, and how those concerns were addressed.
- #10: Does your project address or accommodate the anticipated effects of climate change?
- #11: Describe the sponsor's experience managing this type of project. Describe other projects where the sponsor has successfully used a similar approach.
- #12: Will veterans (including the veterans conservation corps) be involved in the project? If yes, please describe.

Project Application Report - 24-1120

Restoration Supplemental

#1: What level of design (per Appendix D) have you completed? Please attach.

#2: Will (or did) a licensed professional engineer design the project?

#3: Does the project include measures to stabilize an eroding stream bank?

#4: Is the primary activity of the project invasive species removal?

#5: Is the primary activity of the project riparian planting?

#6: Describe the steps you will take to minimize the introduction of invasive species during construction and restoration.
Consider how you will use un-infested materials and clean equipment entering and leaving the project area.

#7: Describe the long-term stewardship and maintenance obligations for the project.
